Office Action Summary	Application No. 10/714,553	Applicant(s) SAGOL, SAMI	
	Examiner James R. Brittain	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I in the reply filed on April 4, 2006 is acknowledged.

Claims 13-15 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on April 4, 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kanzaka (US 4193172).

Kanzaka (figures 2-4, 8, 9) teaches a coupling between a sheet member in the form of an apertured pull tab 11 that can have rectangular form and a thermoplastic polymer receiving member 14 defining a recess with spacers 35, 36 between the recess wall defining grooves 38, 37, 39. The sheet member in the form of the pull tab is received within the receiving member so that the spacers extend inwardly in the insertion direction from the recess wall defining grooves 38, 37, 39 so that the recess has a width greater than the groove width between the spacers 35, 36 and the opposite recess wall defining land 32. This is shown in figure 4, between the recess defined between groove 34 and land 32 versus the lesser separation between spacers 35, 36 and

land 32. A projection 26, having a slanted front face 28 and a perpendicular rear face 27, extends inwardly from the recess wall 32 so as to snap into the aperture of the sheet member. The projection 26 is inherently pressed outwardly by the insertion of the pull tab. In regard to claims 8-11, applicant's claims do not specify which sidewalls are being referred to and in Kanzaka, the sidewalls defined by the grooves 38, 37, 39 are of uniform thickness, are thinner than the width of the recess, the spacers are formed integrally with the sidewalls defined by the grooves 38, 37, 39 and the spacers through their thickness and width define local areas stronger than the sidewalls defined by the grooves 38, 37, 39. Applicant's claim construction is broad and permits this interpretation of the structure of Kanzaka.

Conclusion

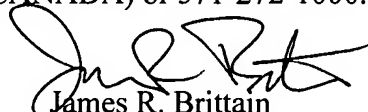

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents of Conley et al. (US 6261026, figure 7), Carlstrom (US 4444321, figure 10) and Federico (US 5033669, figure 7) teach pertinent fastener structure.
